Think of the Style of Health Care You Are Practicing

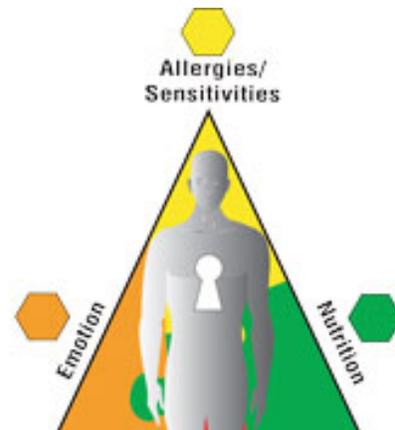

Dear readers between the initial release of this article and today something happened to the web site that contained the video we so wanted to share with you. Although it is nothing we have control over, we apologize for this inconvenience.

To remedy this we have created a new article for you.

Dear Practitioner,

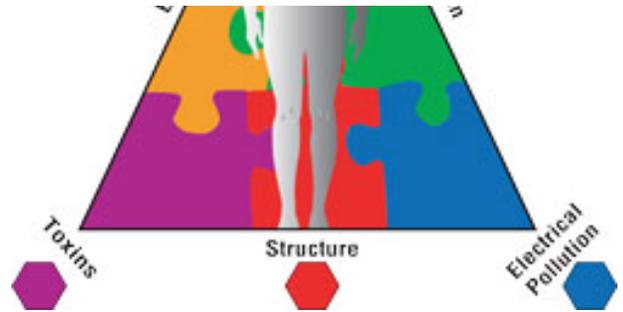

Does your practice meet the needs of the times? Is what you have to offer what you want to receive now and in your health care future. If you are stuck on what happened in the past and expect yourself to keep up in the future, I think you quit thinking.

Our philosophy can stay constant, in that, **"the same intelligence that created us can also heal us, as long as their is no interference"** will always be true. There are however, many more possibilities and degrees of severity that can cause interference. We have identified "6" in the **Six Steps To Wellness**. As of late I am personally learning a hard lesson on #6, Toxins and how we have no idea how severe and how many hidden toxins we have been exposed to and our body is dealing with. There is much more to share with you in

the near future. We are all in a contest for our lives by identifying the 6 Interferences and balancing them with the 6 Steps To Wellness.

The world is becoming a smaller place and the competition no longer just lives next door. *There has never been a better time to be a Wellness Practitioner.* You are in the right place and this is the right time as long as you are doing the right things.

We are dedicated to keeping on with keeping up so you never get behind. I was privileged to lecture with Paul Zane Pilzer, at Parkers in Vegas this year. I also got to talk to him one on one. He has released **The NEW Wellness Revolution book**. He states in there that "Wellness" is like the shot heard around the world. He said scientists, doctors, nutritionists, business people, food manufacturers, restaurant owners, husbands and wives want to be well, sell wellness and distribute wellness, which makes it the next Trillion Dollar Industry.

He says we are on target to a go from the now \$500 billion to the trillion by 2010. He states he hit the growth spurt on the head in his first book but even underestimated how fast parts of it would grow and that **the wellness movement** would be even at the McDonalds and Walmart level. They have caught the vision. Have YOU?

We have been developing and teaching the wellness model for over 30 years. We are not only ahead of the curve on wellness, we are defining it in many areas e.g. the **Nutri-West** pharmaceutical grade nutrition and the techniques we teach using the equipment from Erchonia Medical.

There are so many new techniques and innovations we have to share with you we are excited to see you soon at one of our seminars. Please go back and click on the link and sign on for the next possible Nutri-West / Brimhall Seminar to keep you ahead. There really isn't any competition to compare us too.

You, as part of the **TEAM** are taking **WELLNESS** to **THE WORLD**.
