How using the Computerized Questionnaire, Blood Evaluation and the Six Steps Produced the Miracle in a 300 Cholesterol

Dr Ben Bowers,

First let me congratulate you on a first rate program! I started the **"Doctors Of Wellness"** Computerized program right after I saw it at homecoming this year. Until recently, I have only been interpreting old and recent lab reports from patients, helping them understand their bodies and our treatment better. A lot of times people don't even know their blood type, let alone what the labs are showing them.

This program allows them to not only know what labs were run, but what the labs are for. I live and practice in a rural area, which limits me to a small network of people. I started working with Lab One, using the P.O.C. you have on your training area and she passed me on to my area representative and set me up. We are able to request labs but are not currently a collection sight. We are having a little "education" difficulties with one area collection

sight, but that's pretty minimal. It also allows us to show others a little of what we do, because "a chiropractor" is requesting labs.

As for one success story, I have a patient that is a 35 year old female that has been closely watching her cholesterol for the past several years. Constantly "high," her cholesterol sat at the high 200's and on occasion jumped into the 300 range. She therefore was threatened with a prescription that she did not want. She told her MD at a cholesterol clinic, that she wanted 6 months to get it down. She was told that they would see her "soon."

We tested her with the **Total Health Scan** using the Violet/Red (DermaLaser) challenge. We used two scoops of **Total Green** twice per day, **B complex**, **Homocysteine Redux** and other appropriate Nutri-West nutrition e.g. **Total Lipotropic** along with all **Six Steps** and the **Doctors of Wellness computerized program**.

We did **A/SERT**, **Emotional work** with **Feelings Buried Alive** and the **DermaLaser**, **R.E.S.T**, **guided imagery** and of course used the **Adjustor** and **Percussor** techniques along with all the rest of the six steps.

I can not only show her improvement,

but prove it! From Feb 2007 to April 2007 her total cholesterol went from 311 to 234, LDL went from 244 to 173, and HDL's stayed the same. Triglycerides went from 95 to 70 which are both considered optimal. The tests helped her and us to realize where we had made great strides and where we still have some room for improvement in the LDL's. It also shows all of us we are definitely on the right track! Even the MD that had no hope for her without medication.

We have been doing the Brimhall work for right under 2 years now, and it is true **"We see miracles daily."** It is good to see it on paper and be able to prove it as well!

Dr David Lee came up with, **"Your body, Your health, Your choice"** and I reiterate this to my patients all of the time.

I know that this patient is comfortable with her healthcare choices. The questionnaire and the computerized profile, with the printout help me with my recommendations, and her, with her decisions.

Thank you!

Yours in Health & Wellness,

Joseph J Pils II, D.C.

A Word From Dr. Brimhall

We cannot be robbed from our freedom!

The FDA is proposing things that would disassemble the natural wellness industry as we know it. Please look over the following, its VERY important. I have combined two of the emails I've received, the second has the actual FDA "guidance" that is being proposed. I've called some of the phone numbers listed and they are real. Here is an excerpt of what is being proposed:

his means, for example, if a person decides to produce and sell raw vegetable juice for use in juice therapy to promote optimal health, that product is a food subject to the requirements for foods in the Act and FDA regulations, including the hazard analysis and critical control point (HACCP) system requirements for juices in 21 CFR part 120. If -the juice therapy is intended for use as part of a disease treatment regimen instead of for the general wellness, the vegetable juice would also be subject to regulation as a drug under the Act.

Even massage lotion could be regulated. This is really serious. Time is short. We have until April 30 to provide feedback to the FDA. Please copy and paste this and send to your email list.

These are the two links that are recommended for email contact:

<http://tinyurl.com/2u7ghc>

Additionally, I would recommend calling and writing federal legislators, see <http://www.nea.org/lac/writing.html> for how to do this. The Dietary Supplement Health & Education Act (DSHEA) needs defending. Note: Phone calls and letters rate over an email.

"Freedom is lost when good men do nothing."

Dr. John
