NUTRI-WEST NUTRITION AND THE ZERONA LASER IN ANTIAGING

January 5, 2009

In this article and at Homecoming... we will review the research and application of Nutri-West Nutrition and lasers in general, highlighting the Zerona Laser specifically in its health, weight loss, fat reduction, detoxification, antiaging, and body contouring applications.

The last two weeks in the Puzzle Pieces we have reviewed how Dr. John Devore and Dr. Robert Ornelas are using Nutri-West Nutrition, foot baths, chiropractic treatment, and the Zerona Laser to promote health, wellness, detoxification, weight reduction, the lowering of serum triglyceride, and the diminution of cholesterol levels, as well as body contouring. Research shows that many toxins are

Upcoming Seminars

([see Complete 2009 Schedule](#))

stored in the fat. Also bad fat has been shown to stimulate the production of more bad and toxic fat. The comprehensive programs we have developed at Nutri-West, with the use of the Erchonia Lasers and specifically the Zerona Laser, have given unprecedented results.

We are using Total Trim, Total Thyroid, Iodine Rescue, Total Liver Detox, Total System Detox, Niacin B-6, DSF, Total Mitochondria, Total Lipotropic, and Core Level Lymph as indicated. We are developing a new Total Fiber and a 500 mg Total L Carnitine. These are given orally and sometimes driven into the body with the EBi Iontophoresis. The adrenals and liver may show stress after multiple Zerona treatments. Therefore we support the body with oral administration of the nutrition indicated or use Iontophoresis to deliver it. Three of the most common indicated nutritionals are Total Liver Detox, DSF, and Core Level Lymph after Zerona administration. Of course Total Mitochondria may be necessary in almost all chronic or degenerative conditions and when the body is under stress of any kind.

Below is an outline by Dr. Maloney of the revolutionary combination of Nutrition and Laser

Special Guests at

Homecoming

Dr. Brian Eric LeCompte

One of our guest lecturers at Homecoming is Dr. Brian Eric LeCompte, who tests and treats using genetic profiles with natural therapies in his clinic and is highly published. Please click this link for his CV and Bio:

- [Dr. Brian Eric LeCompte's CV and Bio](#)
-

Dr. Ryan Maloney

Dr. Ryan Maloney, a PhD, will cover the research on the Zerona Laser, the many uses and health improvements seen with its use. You will find his CV and Bio here as well by clicking on this link:

- [Dr. Ryan Maloney's CV and Bio](#)

If you use laser this presentation is not even optional, it is a must. If you don't and hear his presentation, I think you soon will be doing LLL or low level laser.

Therapy that will be presented at Homecoming.

Never before have we put together such a combination of presentations to change your life and practice. Please register today for the seminar and make your hotel reservations.

By: Ryan Maloney PhD

I will walk physicians and clinicians through the biochemical mechanism employed by the Erchonia lasers with special emphasis on the Zerona or LipoLaser. I will discuss how laser energy can manipulate the intra cellular redox state, activate transcription factors, and affect gene expression. We will discuss how laser therapy can induce the formation of a transitory pore within the membrane of adipocytes, and how a subsequent reduction in adipose tissue volume can occur. We will review the results obtained in our placebo-controlled, randomized, double-blind clinical study. Finally, I will end our discussion with the results obtained from our non-randomized, non-controlled pilot study analyzing laser therapy's efficacy of lowering serum cholesterol and triglyceride levels.

Dr. Robert Ornelas

Dr. Robert Ornelas is one of our Certified Brimhall Practitioners and was one of the first chiropractors to add the Zerona Laser Protocols with the Nutri-West Nutrition and has had incredible results. He will do a Puzzle Piece on his experience to be released in the next couple of weeks. He will be part of the program at Homecoming and will present his office protocol, which has been and is overwhelmingly successful for health, wellness, and profitability. He will workshop the Zerona Laser, foot baths and Electro Magnetic therapy with the appropriate Nutri-West nutrition at Homecoming. He is bringing along his office staff Amy Lai and Ampee Gomez, to show you how it all fits together. He recently told me, since he met Nutri-West and Dr. Brimhall at a Las Vegas Parker seminar four years ago, he has increased his production and profitability two and one half times.

Part 1: The science of laser therapy

- 1) The biochemical mechanism of laser therapy
 - Studies that have identified the biological benefits of laser therapy (gene expression, protein synthesis, cellular proliferation, stem cell differentiation, growth factor and cytokine release, and suppression of pro-inflammatory cytokines)
 - a. The absorption of light (How can light perform such a unique and phenomenal biological role?)
 - i. Mitochondria's role in the regulation of gene expression
 - ii. Cytochrome c oxidase (absorption of light)
 - iii. Changes in the mitochondria subsequent to laser irradiation
 - iv. Alteration in superoxide levels
 - v. Alteration in transcription factor functions
 - vi. Gene expression
- 2) The induction of a transitory pore
 - a. Discuss Dr. Niera's, Solarte's, and Dr. Susan Lim's work identifying the formation of a transitory

Dr. Jay Mead and Dr. Erin Lommen

Dr. Jay Mead and Dr. Erin Lommen will cover the Labrix testing and be reporting as follows:

Saliva versus Serum: the science behind the testing and the effectiveness of topically applied hormones.

Women' Health: from PMS to Post menopause.

Nuts and bolts of testing and treatment of Men's Health: from ED to Andropause.

Nuts and bolts of testing and treatment Iodine: it's Medical Uses and the treatment of thyroid deficiency.

Dr. Don Bellgrau

Don Bellgrau, Ph.D., tenured Professor of Immunology, will present a simplified but fascinating explanation of the immune system's inner workings and how nutrition plays a role.

pore in the membrane of adipocytes.

b. Discuss the research revealing the collapse of healthy and whole adipose panicles.

c. Discuss the studies supporting laser therapy as an adjunctive tool to assist in liposuction

3) Laser therapy as an independent instrument for non-invasive body contouring

a. The results from our placebo-controlled, randomized, double-blind clinical study

b. The role laser therapy can play in the reduction of all subcutaneous fat regions

c. The role of the lymphatic system and the removal of the evacuated fatty materials

4) The reduction of serum triglyceride and cholesterol levels

a. Discuss the results of a non-randomized, non-controlled study investigating laser therapy's ability to affect serum cholesterol and triglyceride levels.

b. The potential mechanism employed by laser

therapy that results in the reduction of serum triglyceride and cholesterol levels in just two weeks.

5) Summary-Laser therapy as the safe and non-invasive alternative for a healthy exterior and interior, and a means for your patient's to achieve their cosmetic desires.

This is only a one and a half hour sample of the three days of Homecoming '09. You better take a lot of Total Brain. Genetic and genomics will be discussed by Dr. Brian LeCompete the same morning, along with Dr. Robert Ornelas showing you how he uses Nutri-West Nutrition and the Brimhall Protocol in conjunction with his Zerona Laser and foot bath.

WOW! SEE YOU THERE,
