Dr. Brimhall's
One More Piece of the Puzzle
For Wellness

A/SERT with Laser, Red and Violet/Red and Nutri-West Nutrition

Allergies and sensitivities are very common in patients. If you are not testing or treating with A/SERT, you are missing a very important piece of the health puzzle.

In the Brimhall Seminar Manual, you will find the recommended and standard technique. In our book, Solving The Health Puzzle with The Six Steps To Wellness, we cover allergies and the treatment in much greater detail. We highly recommend you read these two resources and make our book available to all of your patients or potential patients. Also the two patient CD's: 1)The Six Steps to Wellness and 2)Wellness For Life are a must to educate your patients and save your valuable time.

You will find the Erchonia 635nm Red Laser use is standard protocol on all of our A/SERT treatments to laser the organs, spine, spindle cells, brain involvement etc. Please refer to the sections in the seminar manual and book.

This weeks puzzle piece comes from questions from those using the DermaLaser or the Violet/Red combination of the 405/635nm. This laser greatly increases the results and reduces the time of treatment.

Of course the beginning is the same in treatment. Choose organs out of the basic kit along with the respective daily treatment e.g. hormones for day two or virus for day seven etc. Then go to your N-W nutritional test kit and test for which heavy metal the patient chooses that day and the appropriate companion essential oil. Now test from whichever kits you desire for possible offending foods, infections, pollens, organs or systems etc that may test positive. Of course you have the patient hold the vials for any of these offenders.

Here is where the difference begins if you have the DermaLaser or Base Station containing a violet-red combination. You now do the regular scan you have been taught to do with the violet/red (sympathatic/parasympathic) laser.

1. You shine this combination laser over the adrenals and you will find this weakens previously strong muscles
2. You shine it over the different areas of the spine and identify which show a positive test by weakening previously strong muscles
3. You then shine over the heart area to uncover emotions related to the adrenal and spinal

weaknesses. Now you go back and hold the combination over these areas until they strengthen. The violet uncovers or unlocks the door and the violet/red heals and promotes balance and healing, including the release of emotions.

Now you go through the entire Total Scan and uncover all weaknesses, stacking the information and not treating until the end. You also use the violet to stress-test each area of the brain, namely: frontal, each parietal and temporal, then the occipital lobe and the cerebellum bilaterally. Once all of the weaknesses have been revealed, you treat each area that was positive with the violet-red combination until all positive reflexes strengthen.

You have desensitized the patient at this point. Plus you have made improvements in almost any physical or emotional finding. We recommend you now stimulate the normal acupuncture points as listed eg Li 4, 11, H 7, K 27's, GV 20, St 36, Sp 6, Lv 3 bilaterally etc. to lock all of this information in.

Then test the non-infectious allergy point in the palm of the hand to make sure they are complete. Usually this is so effective, your treatment time is just minutes and you do not have to have them hold for 20 minutes. If you are going to do a regular treatment with the Adjustor and/or Percussor, you naturally have them hold the vials the entire time.

Please support each organ that went on display during the violet challenge with the appropriate Nutri-West nutrition. Remember the nutrition is given three times per day and it brings them back to balance each time it is given. Please retest the patient's nutrition each 30 days.
